

**ROH, INCORPORATED -
PEOPLE COMMITTED TO
QUALITY SERVICE**

AT ROH,
OUR MISSION IS TO BE
THE PREMIER PROVIDER
OF GOVERNMENT AND
BUSINESS SOLUTIONS
THAT ENABLE OUR
CLIENTS TO MAKE THE
MOST EFFICIENT USE
OF RESOURCES.

J Stephen Smith, President

ROH, Incorporated was founded in 1971 and provided IT solutions to federal, state, and commercial clients. Our core competencies are in the areas of IT consulting, document management, network support, logistics, programming, web development and design, database administration and, professional contract services.

We are a service-oriented company that believes customer service and satisfaction is paramount for continued corporate growth, so we "partner" with clients before, during, and after product delivery. Our mission is to be the premier provider of government and business solutions that enable our clients to make the most efficient use of resources. I am especially proud of our reputation for providing quality service at a fair, competitive cost to every client. The number of clients for whom we have served for ten to twenty years is a testament to the quality service we provide.

ROH has been providing integrated document and records management systems into numerous organizations, providing requirements definition, customization, installation, training, maintenance and support since 1993. As a result of our experiences, ROH recognized a need and developed our own web-based document management product, **OCULUS**. The OCULUS document management solutions may be deployed at any organizational level - for departmental, enterprise, or general public access.

Details on this proven product can be found at our companion web site. I am convinced that OCULUS is a complete business solution that will enable business and government entities to maximize performance well into the 21st century.

Throughout our history, ROH has utilized teaming agreements as both prime and subcontractor to provide clients with an expanded range of professional service capability. We know how to make teaming work. Similarly, as we extend the opportunities offered by the OCULUS product throughout the country, we envision a small, but extremely capable, cadre of resellers for this product. If you are interested either in a teaming arrangement or participating in the ROH VAR program, please contact me to explore options.

As you browse through our web site, you will learn that ROH is a stable small business that is adapting our capability to the demands of the new century. We are in the forefront of knowledge management technology and providing business solutions to our clients. Throughout our history, ROH has provided quality support that has adapted to the changes in the technology and business practice. The ROH trademark has been able to adjust and evolve to employ the latest technological solutions to improve the business processes of our clients. We at ROH are excited by the promise the future holds.
